

Endospheres published scientific studies

1. Vascularizing action of the Compressive Microvibration Endospheres

2. Compressive microvibration in the cellulite treatment: retrospective study

3. Thermographic and clinical data (TCD Code) in the evaluation of cellulite treatment by Endosphères Therapy

4. Eva Endosphères Therapy: a non invasive treatment for face aging

5. Treatment of lymphedema, two methods compared: ketogenic diet and endospheres, ketogenic diet and vodder lymphatic drainage

6. Compressive Microvibration with Endosphères Therapy: Retrospective study

7. Evaluation of the effectiveness of non-invasive methods of compressive microvibration and ablative sensory microvibration on local areas with excess fat deposits in volunteers of different age groups

8. Fat tissue reduction by depurative diet and compressive microvibration with spheres of variable density

9. Ultrasonographic Picture Of The Skin And Subcutaneous Tissue In The Treatment Of Cellulite Using The Compressive Microvibration®

10. Generative medicine - towards a systematization of mechanical compressive microvibration treatments in aesthetic, regenerative, and anti-aging medicine: theoretical bases, tissue targets, and classification
